

SAMUEL BALDASSO

Software Engineer · Mobile Specialist & Java Backend

Brazil (Remote-ready) · baldassosamuel93@gmail.com · linkedin.com/in/samuel-baldasso · github.com/samuelbaldasso

SUMMARY

Software Engineer with 4+ years of comprehensive experience across the entire software development lifecycle, specializing in Native Mobile (Android/Kotlin), Cross-Platform (Flutter), and Enterprise Java Backend (Spring Boot, Quarkus). Proven track record delivering software for global market leaders including IBM, NTT DATA, and CI&T. A T-shaped engineer uniquely positioned to bridge the gap between complex client-side applications and robust cloud architectures, optimizing end-to-end performance and system observability. Fluent in English (C1) and proficient in Spanish (B2).

TECHNICAL SKILLS

Mobile: Android (Kotlin, Jetpack Compose), Flutter, State Management (BLoC, Provider)

Backend: Java, Spring Boot, Quarkus, REST APIs, Microservices, JAX-RS, Kafka, Distributed Systems

Front-end: React, Next.js, Angular, TypeScript, Node.js

Infra & Data: AWS, Azure, Docker, CI/CD, PostgreSQL, MySQL, MongoDB

Testing: JUnit, Mockito, Testcontainers

EXPERIENCE

Full-Stack Software Engineer

May 2025 – Present

IBM · Enterprise Consulting (Bradesco client — E-AGRO project)

- Engineering distributed Java microservices (Spring Boot, JAX-RS) for the E-AGRO platform, handling high-volume workloads and implementing cloud-native observability.
- Acted as a Full-Stack developer by integrating TypeScript/Node.js backend architectures with responsive React frontend applications.
- Collaborating in multi-functional, remote teams to review system design, improve data pipelines, and ensure fault-tolerant deployments on AWS.

Software Engineering Consultant (Independent Contracts)

Oct 2024 – Apr 2025

Enterprise Projects: SBM Technology, CI&T (Vivo client), Montreal Informática

- **SBM Technology:** Developed scalable enterprise web applications leveraging Java and Angular workflows.
- **CI&T (Vivo Client):** Refactored critical architectural bottlenecks in backend workflows, significantly improving throughput and strengthening automated CI/CD deployment pipelines.
- **Montreal Informática:** Engineered and optimized high-performance backend Java APIs, focusing on maximizing latency efficiency, scalability, and system fault tolerance.

Software Engineer (Rotated Mobile & Backend Projects)

Apr 2022 – Oct 2024

NTT DATA

- **Bees Force (AbInBev):** Engineered native Android applications utilizing Kotlin, Jetpack Compose, and Clean Architecture for an enterprise B2B field platform used across the global AbInBev ecosystem.
- **Allianz Auto:** Built and deployed robust cross-platform mobile features using Flutter for a mobile application supporting a large, nationwide user base.
- **Allianz:** Maintained and developed core software features using Java EE integrated with enterprise legacy infrastructure (IBM DB2, COBOL), alongside dynamic Angular client-side interfaces.
- **RD Saúde:** Implemented scalable and responsive micro-frontend components using React and Next.js frameworks.
- **Career Progression:** Started as an Android Development Intern and earned a promotion to Junior Software Engineer within 6 months due to high technical ownership.

PROJECTS

Banking Ledger Core System — github.com/samuelbaldasso

Learning project implementing a double-entry ledger with Clean Architecture and DDD.

- Implemented the Transactional Outbox pattern (Kafka + PostgreSQL), double-entry validation, pessimistic locking with deadlock-free ordering, AES-256 encryption at rest, and OAuth2/JWT authentication via Keycloak.

Tech: Java 21 · Spring Boot · Kafka · PostgreSQL · Keycloak · Docker · Flyway · Clean Architecture · DDD

Java Subscription Platform — github.com/samuelbaldasso

Learning project exploring six distributed-systems patterns in a B2C subscription system.

- Applied the Transactional Outbox pattern, Optimistic Locking, Kafka idempotency, Redis caching, and Resilience4j circuit breakers within a single, cohesive system.
- Built the full billing lifecycle (trial, renewal, cancellation) with event-driven async processing and Testcontainers integration tests.

Tech: Java 17 · Spring Boot 3 · Kafka · Redis · PostgreSQL · Resilience4j · Testcontainers · Docker

EDUCATION & LANGUAGES

Bachelor's Degree in Information Technology — FeMASS, Macaé, Brazil

English — Full Professional Proficiency (C1) · Spanish — Professional Working Proficiency (B2)

Certifications: AWS Certified Cloud Practitioner
